

About my business and me

Michael Mittelhaus, trained in Berlin in Mathematics and as a teacher, spent years in the computer business, soon concentrating on PrePress systems. Following an engagement with Rank Xerox EEO/London, he joined a Berlin based vendor, with whom he installed a Newspaper system. Later he left to work for a repro shop, introducing Macintosh Systems there.

In 1994 he founded his own consultancy business, specialised on CtP, Workflow, JDF and organisational items. He's consulting both user and Vendors, predominantly in Austria, Germany and Switzerland, but also throughout Europe.

He's also active as a speaker at industry seminars and as a journalist for trade press magazines like "Deutscher Drucker" (D), AGI (S/N/Dk), Produktion+Print (CH), Print-Week (UK) and Seybold Report (USA). He's editing a series of booklets on the topics of CtP, DI-Offset and PrePress Databases (German language only).

Michael Mittelhaus lives with his wife and two children near Osnabrück in Germany, that's halfway between Hannover and Amsterdam.
